SECURITY BUSINESS UNIT

EntroWatch v1.3 continues to break new ground in the access control security management market expanding its sophisticated array of key standard features – many of which would be costly add-ons compared to its competitors.

KEY FEATURES

- ONVIF Profile S video client with live view monitoring
- One-to-many peer to peer I/O mapping
- Programmable manual, automatic and scheduled actions
- Global anti-passback
- Interlock facility
- Global lockdown
- Fire door support
- Custom badge designer
- Passback and PIN immunity
- Custom card format editor
- Attendance reporting suite
- Biometric reader support

A NEW APPROACH TO ACCESS CONTROL

TRULY THE WAY FORWARD IN ACCESS CONTROL

Global lockdown provides a single click action to lock down all doors in the event of an emergency. The lock down icon appears at the top of every screen in EntroWatch. Specified doors can be excluded from the automatic lockdown.

Remsdaq Limited, Parkway, Deeside Industrial Park, Deeside, Flintshire, CH5 2NL United Kingdom remsdaq.com EntroWatch supports the automatic discovery and display of any ONVIF Profile S CCTV camera. Discovered cameras are automatically displayed in sequence on the EntroWatch dashboard and can be included in graphics. Snapshot capture of any camera is also featured.

Actions can be configured to operate automatically (e.g. fire alarm), via schedule (e.g. disable alarms during office hours) or via operator instruction (e.g. turn on all the floodlights). All actions are configured in the EntroWatch host and downloaded to the panels for autonomous operation. Peer to peer operation is also supported.

Minimum

Windows 7 32-bit SP I Intel Core 2 Duo Processor I 600 × 900 Screen Resolution 4GB RAM Hard drive with at least 60gb of free space 10/100 Ethernet
